Subject: Introduction of Standard and Advanced Levels in Mathematics and Science for Students of Grade IX (CBSE)

Dear Parents,

Greetings from Delhi World Public School.

The Central Board of Secondary Education (CBSE), in line with the recommendations of the National Education Policy (NEP) 2020, has introduced a new assessment framework for Mathematics and Science for students entering Grade IX from the Academic Session 2026–27.

1. Overview of the New Framework

Under the revised structure, all students will study the **Standard Course** in Mathematics and Science as part of the regular curriculum. In addition, students may choose to appear for an **Optional Advanced Assessment** in Mathematics, Science, or both subjects.

2. Examination Structure

Assessment	Marks & Duration	Nature of Assessment
Standard Mathematics	80 Marks Theory + 20 Marks Internal Assessment Duration: 3 Hours	Mandatory for all students; assesses core concepts, competency-based learning, and application of mathematical skills.
Standard Science	80 Marks Theory + 20 Marks Internal Assessment Duration: 3 Hours	Mandatory for all students; assesses conceptual understanding, scientific reasoning, and application of knowledge.
Advanced Mathematics (Optional)	25 Marks Duration: 1 Hour	Focuses on higher-order thinking skills (HOTS), analytical reasoning, advanced problem-solving, and real-life applications.
Advanced Science (Optional)	25 Marks Duration: 1 Hour	Focuses on deeper conceptual understanding, scientific inquiry, critical thinking, and application-based learning.

3. Who Should opt for the Advanced Assessment?

The Advanced Level may be beneficial for students who:

- Demonstrate strong aptitude and sustained interest in Mathematics and/or Science.
- Enjoy analytical thinking, logical reasoning, and problem-solving.

5. Important Considerations

Before opting for the Advanced Assessment, parents and students are advised to consider:

- The student's genuine interest and aptitude in the subject.
- Ability to manage additional academic commitments effectively.
- Availability for extended learning hours, transportation, and scheduling requirements, if applicable.
- The need to maintain a healthy balance between academics and co-curricular activities.

6. School Support and Guidance

The school will provide continuous guidance to students and parents regarding the suitability of the Advanced Level assessments. Subject teachers and academic coordinators will be available to discuss individual student readiness and address any queries.

Further details regarding registration procedures, timelines, and implementation guidelines will be communicated upon receipt of official directives from CBSE.

We encourage all parents to discuss these options with their child and the concerned subject teachers to make an informed decision that aligns with the student's strengths and interests.

Note:

Students who are enrolled at the advanced level are required to sit for an additional hour of examination beyond the standard paper, although participation in the Advanced Assessments itself remains entirely voluntary (Not Mandate).
